Full Stack Developer | Innovation & Education Enthusiast

Professional Summary

Passionate and goal-driven professional with a multidisciplinary background in Full-Stack Web Development, English Language Education, and Digital Communication.

With a unique combination of technical expertise and a foundation in education, I am dedicated to driving innovation and sustainable growth within educational and organizational systems.

My experiences in technology, management, and mentorship have equipped me to design solutions that improve institutional efficiency, learning, and communication. I am eager to leverage these skills to advance research, innovation, and higher education leadership.

Core Skills & Competencies

Technical Development

- Full-Stack Web Development, RESTful API Design
- Frontend: HTML, CSS, Tailwind, JavaScript, jQuery, React, Next.js
- Backend: PHP, Python | Database: MySQL

Leadership & Innovation

- Educational Innovation & Management
- Strategic Planning & Institutional Development
- Team Leadership & Mentorship
- Research and Academic Communication

Digital Marketing

- Digital & Social Media Strategy
- SEO and Online Presence Optimization

Tools & Collaboration

- Git & GitHub | Project Management | Technical Documentation
-

Projects

OurAgentNG – Real Estate Property Management System

- Developed a complete property listing and management dashboard for real estate agents.
- Integrated an agent verification system and geolocation API for property tracking.
- Enhanced trust and transparency through secure digital workflows.

Technologies Used: JavaScript, PHP, MySQL, HTML, CSS

→ Demonstrated my capacity to design scalable systems that improve institutional coordination and efficiency.

MiraLux Boutique Store – E-Commerce Platform

- Built a functional online store with shopping cart, payment gateway, and admin management tools.
- Designed a responsive UI and implemented data-driven decision dashboards.

→ Reinforced understanding of digital transformation and user experience optimization.

The Vault IQ ERP Web Application (Entacrest)

- Developed ERP modules for supplier, payment, and purchase management.
 - Enhanced user navigation and performance optimization for scalability.
- Strengthened skills in institutional process automation and systems innovation.

Clinic Management System

- Designed intuitive dashboards for administrators and users with clean UI/UX.
 - Integrated APIs for data management and ensured cross-platform responsiveness.
- Illustrated how digital tools can streamline management systems similar to education and research institutions.

Professional Experience

Kendanisa Consulting and Travel Company

Frontend & Backend Developer | Sept 2025

- Developed features including flight search, booking, and destination filtering.
 - Implemented authentication systems and optimized performance with Next.js and Node.js.
 - Collaborated on user experience design and system scalability.
- Applied technology-driven project management principles relevant to innovation in service and education systems.

Philove Humanitarian Support Foundation

IT & Communications Officer / Oct 2025

Coordinate and support the planning, execution, and monitoring of educational, humanitarian, and community development programs. Manage stakeholder engagement with schools, students, community leaders, and partner organizations to ensure successful program delivery.

Responsible for managing and maintaining the foundation's website, ensuring content is updated, accurate, and aligned with organizational goals. Publish program updates, event reports, announcements, and digital content to enhance the foundation's online presence and visibility.

Develop and manage social media content, promotional campaigns, and public awareness initiatives. Coordinate outreach programs, educational competitions, community events, and humanitarian interventions while maintaining proper documentation, reporting, and communication with stakeholders.
